

The GSM SMS Module provides convenient SMS Alert Messages as a wireless communication solution to monitor Alarms and Status for any remote equipment at site.

This low-cost solution provides effective and timely SMS Alert messages to minimise remote equipment downtime, and unnecessary traveling for Service Engineer to constantly having to check on the equipment physically.

Features :-

- Simple in operation and Low-Cost
- Operating on low voltage DC 5V, 1.5A Power Supply
- Compact in size, and operate without any telephone land line
- Up to 8 Monitoring Status Input to activate SMS Alerts
- The 8 Monitoring Status Input could be configure with different SMS Messages
- Support up to 6 Mobile Phone Numbers
- Compatible with 2G, 3G and 4G SIM Card and Network
